EXECUTIVE SUMMARY

Analytical and detail-oriented **BCA graduate** with hands-on experience as a **Data Analytics Intern at Hummingbyte Pvt Ltd.** Proven expertise in building interactive **Power BI dashboards** and performing **data cleaning (ETL)** to drive business insights. Skilled in **DAX, data modeling, and SQL**, with a track record of delivering **3 successful analytics projects**. Passionate about transforming complex raw data into clear, actionable visual stories that support strategic decision-making.

AREAS OF EXPERTISE

Programming Languages: C Language, C++, Python

Core Skills: Data Cleaning (ETL), DAX (Data Analysis Expressions), Data Modeling, Python (Numpy, Pandas, Matplotlib).

Data Analytics: Power BI, Advanced Excel (Pivot Tables, VLOOKUP), Data Visualization.

Soft Skills: Analytical Thinking, Quick Learner, Problem Solving, Team Collaboration.

PROFESSIONAL EXPERIENCE

HUMMINGBYTE PVT LTD, NASHIK, MAHARASHTRA Jun 2026 – Oct 2026

Data Analyst Intern

Environment: Python (Pandas, Numpy), MS Power BI, SQL, SSMS, Advanced Excel (Pivot Table)

VOIS AND EDUNET FOUNDATION Aug 2026 – Present

Data Analyst Intern

Environment: Google Colab, Jupyter Notebook, Data analysis with LLMs like Gemini, Julius AI, IBM BOB

EDUCATION

BCA IN COMPUTER APPLICATION **2023 – 2026**

Mahatma Gandhi Kashi Vidyapeeth, Varanasi

Intermediate (Class 12th) **2022**

Sri Krishna Inter College Boharanpur, Babhaniyaw, Varanasi

High School (Class 10th) **2020**

Sri Krishna Inter College Boharanpur, Babhaniyaw, Varanasi

SELECTED PROJECTS

Seasonal Agriculture Performance Analysis (chitranjan-7-8-6.github.io/Seasonal-Agriculture-Performance-Analysis)

- *Jupyter Lab, Google Colab, Python (Pandas, Matplotlib, Numpy, Scipy, Seaborn)*
- Analyzed an agricultural dataset to investigate seasonal differences in performance, identifying meaningful patterns, trends, relationships, and variations driven by environmental conditions, farming practices, resource availability, and market conditions.

Car Market Trend Analysis (chitranjan-7-8-6.github.io/Car_Market_Trend_Analysis)

MS Excel, Advanced Excel (Pivot Table, VLOOKUP, XLOOKUP, HLOOKUP), Excel Formulas, Google Colab, Julius AI

- Analyzed 301 real marketplace listings (2003–2018) to answer 25 questions on pricing, depreciation, and "good deal" detection, separating cars from bikes in raw, unlabeled CarDekho-style data.

Aadhar Enrolment EDA (chitranjan-7-8-6.github.io/Aadhar-Enrolment-EDA)

Anaconda, Python, MS Power BI (Pivot Table), HTML, CSS, JavaScript

- Formulated 4 testable hypotheses upfront, ran the correct statistical test for each, and reported results honestly — including the two hypotheses the data did not support.
- Discovered enrollment rejection is not random: it spikes to 6.92% for children aged 0–5 (vs. 2.73% for adults aged 31–45), likely because biometrics are not fully stable in early childhood; a "more digitally engaged states have fewer rejections" theory was tested and rejected (r=0.27, p=0.11).

A C H I E V E M E N T S &C E R T I F I C A T I O N S

Deloitte — Data Analytics Job Simulation

Learned Tableau to build meaningful insights (organized via the Forage platform); analyzed the company product's CSV dataset to find patterns for better understanding of performance.

Data Visualization — Vois and Edunet Foundation

Learned to select different chart types for different data patterns and applied the Matplotlib library for data visualization.
